NEW DECOMPRESSION TABLE RELIEVES PAIN

Darren Strong from Strong Chiropractic, announces a new, sophisticated computerized decompression table that allows the spine to be gently stretched and relaxed for spinal decompression therapy.

The pattern of alternating pulling and relaxing creates vacuum-like pressure which allows disc material that was herniated or protruded to be pulled back in the disc over time.

Patients will notice a reduction of their pain during these treatment sessions. Stop in today and ask about the new table and how you can benefit.

**NEW NON-PROFIT FACILITATES 15 ADOPTIONS
IN FIRST FOUR MONTHS ACROSS CANADA**

Since launching in May 2021, My Grandfather's Cat has helped arrange second forever homes for 15 cats and dogs in Nova Scotia, New Brunswick, Ottawa and Alberta.

"Four months ago, this was an idea. Today, we have officially helped more than 15 animals find new homes and inspired millions of people around the world," explains founder, Angela Rafuse.

My Grandfather's Cat helps seniors and people with terminal illnesses arrange second forever homes for their beloved pets before they move into retirement homes or pass away. Using social media and digital marketing, the organization finds families willing to adopt these animals, vets each family and gives the senior the ultimate choice of who adopts their animal.

"Our process allows people to find new homes for their animals without the animal ever having to leave the house. The transition is easier for the animal, and allows the families to stay in touch after the adoption."

The organization was inspired by our founder's experience adopting her grandfather's cat, Mackenzie, who became TikTok-famous for being grumpy and going on adventures such as kayaking and hiking. She currently has over 115,000 followers on TikTok and her videos have been liked over 5.5 million times.

"We have more than 160,000 people around the world following our social channels," she explains. "We have built the most incredible online community of people who are cheering us on."

The organization has more than 10 active volunteers helping to facilitate adoptions and seven animals available for adoption on their website. The service is available at no charge across Canada. The organization is funded through merch sales and the generosity of donors.

In support of the on-going work on the walking paths and community gardens.

RADIO DAY TO RAISE FUNDS FOR CANCER RESEARCH

This year's Radio Day, in support of cancer care here in Cape Breton, is to raise funds for a new Echocardiogram Machine for the Cape Breton Regional Hospital.

An echocardiogram, or echo, is an ultrasound that checks the structure and function of the heart and its valves. Cancer treatments, like chemotherapy and radiation therapy, can cause a variety of heart complications for patients. Echocardiogram machines help doctors determine what cancer treatments a patient's heart can handle, and are taken before, during and after treatment to help identify and prevent major cardiac events.

There are currently 150 cancer patients who rely on the Cape Breton Cancer Centre daily, and more than 5,000 cardiovascular and cancer patients who need echos each year. This Radio Day, help support those who need it most, right here, at home.

On October 7, tune in to HOT 101.9 or New Country 103.5, and visit radioday.ca or call this phone number 1-877-567-8077 to give back. **Because You Care!**

Fire Prevention Week Safety Tips

The National Fire Protection Association® (NFPA), the official sponsor of Fire Prevention Week for 99 years, has announced Learn the Sounds of Fire Safety as the theme for Fire Prevention Week, October 9, 2021. From beeps to chirps, this year's campaign works to better educate the public about the sounds smoke alarms make, what those sounds mean, and how to respond to them.

Smoke alarms have played a leading role in reducing fire death rates over the past 40 years, but we still have more work to do in maximizing their effectiveness, said Lorraine Carli, NFPA Vice President of Outreach and Advocacy.

According to the latest NFPA Smoke Alarms in the U.S. report, working smoke alarms in the home reduce the risk of dying in a reported fire by more than half (55 percent). However, almost three out of five home fire deaths occur in homes with no smoke alarms (41 percent) or smoke alarms that failed to operate (16 percent); missing or non-functional power sources, including missing or disconnected batteries, dead batteries, and disconnected hardwired alarms or other alternate current (AC) power issues, are the most common factors when smoke alarms fail to operate.

When the smoke alarms in your home beep or chirp and you can't figure out why or how to make them stop, it can be frustrating. All too often, that frustration leads people to remove the batteries from their alarms or dismantle them altogether, said Carli. These actions place people at serious risk in the event of a home fire.

This year's Fire Prevention Week theme, Learn the Sounds of Fire Safety, helps people better understand the reasons smoke alarms may sound and the know-how to effectively address them, helping ensure that smoke alarms remain in working order. The campaign also addresses special considerations for the deaf and hard of hearing, along with information about carbon monoxide alarms.

Giving people the tools to properly respond to alarms sounding whether it's an actual fire or simply time to change a battery can make a life-saving difference, said Carli.

Key messages for Learn the Sounds of Fire Safety include: When a smoke alarm or carbon monoxide (CO) alarm sounds, respond immediately by exiting the home as quickly as possible.

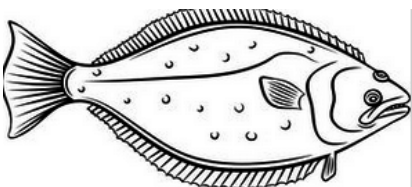

If your alarm begins to chirp, it may mean that the batteries are running low and need to be replaced. If the alarm continues to chirp after the batteries are replaced, or the alarm is more than 10 years old, it is time to replace the alarm.

Test all smoke and CO alarms monthly. Press the test button to make sure the alarm is working.

If there is someone in your household who is deaf or hard of hearing, install bed shaker and strobe light alarms that will alert that person to fire.

Know the difference between the sound of a smoke alarm and a carbon monoxide alarm three beeps for smoke alarms, four beeps for carbon monoxide alarms.

For more information about Fire Prevention Week, October 9, 2021, and this year's theme, Learn the Sounds of Fire Safety, along with a wealth of resources to help promote the campaign locally, visit fpw.org.

COMMUNITY NEWS ITEMS

Phase 5 of Nova Scotia's reopening plan is starting October 4 with a cautious approach. While most restrictions will be lifted, some will be maintained, and border restrictions will be added for people coming from Prince Edward Island and Newfoundland and Labrador.

Some notable aspects of Phase 5 include:

masks will continue to be mandatory in indoor public places
physical distancing and gathering limits for events hosted by a recognized business or organization will be lifted

the informal gathering limits of 25 people indoors and 50 outdoors will remain in place

proof of full vaccination will be required for non-essential events and activities

"The Delta variant has impacted our epidemiology. The fourth wave is taking its toll across the country and it's now in Nova Scotia," said Premier Tim Houston. "We can lift some restrictions with the added protection of the proof of full vaccine protocol and our high vaccination rates, but masking and limits for informal gatherings need to stay in place. We're taking a cautious approach so we can keep moving forward, even in the midst of the fourth wave."

Starting at 12:01 a.m. on October 4, proof of full vaccination will be required for people who are 12 and older to participate in discretionary, non-essential events and activities that gather people together, such as going to restaurants, movies, sports events, theatre performances, social events and the gym.

Based on conversations with people in many sectors in the past week, some changes have been made in the list of places where proof of full vaccination will be required. For example, proof of vaccination will not be required for general library access but will be required to participate in library programs that bring groups of people together. It will apply to dining in at fast-food establishments, but not to takeout, delivery, drive-thru or food courts.

Proof of vaccination will not be required under the provincewide protocol for employees of businesses and organizations that offer these events and activities, but it will be required for their volunteers. Businesses and organizations are encouraged to set their own vaccination policies. Any policies should take legal and ethical implications into consideration. People who are not fully vaccinated need to be able to access essential services.

The proof of full vaccination protocol and resources for businesses and organizations where it applies are available at: <http://novascotia.ca/POV>

Effective at 8 a.m. on October 4, everyone coming to Nova Scotia from other Canadian provinces and territories will need to complete the Nova Scotia Safe Check-in form. Their isolation will be based on vaccination status and testing. People who were fully vaccinated at least 14 days before arriving do not have to isolate, but testing is recommended. People who are not fully vaccinated must isolate for at least seven days and get two negative test results in Nova Scotia to stop isolating after seven days. They must be lab-based tests, not rapid tests.

THE CEILIDH

It's Saturday night in heaven there having a ceilidh
Winston on the fiddle, John Allan accompanee
Charlie picking and singing
Donald From Bras'Dor
never celtic commotion
heard like this before.

The Pearly Gates are rockin'
as these heavenly stars
perform with glee
It's Saturday night in heaven
they're having a ceilidh.

On the celtic side of heaven
musical sounds penetrate
Joe Murphy, Gib and Rita to the
ceilidh congregate
along the way gather
Lee fiddle well in tow
show Saint Peter a thing or too,
about a real Cape Breton
Show.

The Pearly Gates are rockin'
as these heavenly stars
play with glee
It's Saturday night in heaven
they're having a ceilidh.

As the ceilidh nears finale,
there's one more act to go
why it's the miners chorus
pit lamps all aglow
accompanied by band
of angels, singing harmony
to Heaven's National Anthem
Nearer my God to Thee.

It's movie time-and this week it's a triple bill with 3 new high-profile movies, "**Free Guy**", "**Cry Macho**" and "**Old**". I'm a huge fan of Deadpool, and of Ryan Reynolds work, so seeing previews for "**Free Guy**" had me salivating. In a nutshell this movie can best be summed up in 2 words-stupid and awesome! That's not an oxymoron, rather it explains the madness that Ryan Reynolds totally embraces in his movies-madcap comedy, incredible special effects and a good story with some really touching moments amidst the carnage. If you are not a fan of Deadpool you might as well pass on this one. Without giving too much away Ryan's character, "Mr Blue Shirt" lives in a video game (a fact that he's not aware of) and when it comes to light that he is basically an anomaly, with the potential to affect the game's bottom line financially he is a liability to the greedy, thieving game owner who wants him deleted-and the real creators of the game who want to save him. "**Cry Macho**" is the latest effort from 91 year old Clint Eastwood and is a heartwarming tale of a favour owed-and paid, and how love can once again find a place in someone's heart. Dwight

Yoakam also joins Clint for a rodeo ride of family ties and family lies. Basically, Eastwood is guilted into travelling to Mexico to get Yoakam's son as the mother is unfit to take care of him. It is a bit heartbreaking to see Clint age, but the upside is that he is still producing and acting, and still has vim and vigour. God bless him. Lastly, "**Old**" is the latest thriller from M Night Shyamalan and tells the tale of a fancy tropical resort that offers a small group of 'selected' guests a private visit to a secluded beach that is as beautiful as it is menacing. Without giving too much of the story away I will say that for every 30 minutes a person spends on this beach they age 1 whole year. There is a reason for this, which of course is not known at first to the victims. As per any M Night film this one is a visual masterpiece seeped in atmospheric tension-I liked it a lot. So grab some popcorn-or storm chips, settle in and enjoy a movie night!

JACK COOL K-LEE RADIO DJ NEWS

I had the pleasure of interviewing country/folk music artist, athlete and professional keynote speaker Terry Kelly. We had a great conversation - we talked about his music career, we talked about his time at school for the blind in Halifax and how music was always around him. To make

long story short his father once gave him a button accordion when he was young and said when someone gives you a gift you use it. We also talked about his hits and my personal favourite song Driving to Mexico. Terry wrote a song with the Band Master at 14 Wing, Greenwood. He wrote the song when he was honorary colonel. Kelly was honorary Colonel for five years down in Greenwood. The song they wrote is called No Sky Too High and featured guest appearance by astronaut Chris Hadfield. The song is certainly available on YouTube by going to Terry Kelly's YouTube channel @ <https://www.youtube.com/channel/UCVBNpuLfWGRB83S-tZCTA5> Terry Kelly is a great example of anybody with disability can accomplish their dreams. Terry has welcomed me to do a Zoom interview with him at some point and when that happens, I will let

you all know best. Jack Cool. If you would like a copy of my interview with Terry please email me jackcool@mail.com

.....

I had the pleasure last week of interviewing voiceover actress and singer Natasha Perez. Perez is working on some projects she's going to be doing two plays, one is in New York Manhattan in Oct, and the other one's going to be a musical monologue solo work that she wrote called Summer Camp and Summer Camp, of course, will be premiered on the Midwest last year Perez had the pleasure of portraying Yolanda Salvador in the 2020 TV series Selena who was a nurse and who later became the president of Selena Quintanilla-Pérez fan club and sadly the lady who murdered her at the young age of 23 in 1995. She has also worked with actor Larry David in the TV show on HBO called Curb Your Enthusiasm Season 10 where she plays Matilda. She also played Grey in the TV series from 2017 - 2020 in tv room 104 which is an American television anthology series. Special thanks to Anthony Turek for help arranging this interview. If you would like a copy of my Zoom interview with Natasha Perez, please email me jackcool@mail.com and I will send you a copy by We Transfer - have a great week everybody - all the best Jack Cool

Videotapes wear out so save your precious memories before it's too late!
